PLEASE KEEP IN MIND THE FOLLOWING

If a property is vacant, a building is external with no inhabitants, or the project can be done outdoors, projects listed below may be Social Distance Safe. Do not violate health mandates or attempt a project which you feel is unsafe or under-skilled to complete. Always practice safe social distancing when picking up supplies, using specialty contractors or using day labor and request curbside pickup or delivery service when possible. When professionals are completing projects remain safely distanced, or recommended, in another part of the home. Disinfect all surfaces and touch points frequently and when work is complete. Do your best to never allow people who do not live in the household into your home unless it is an emergency. Always follow State and City/Borough Health Mandates and Guidelines. Visit for updates.

KEY

Cost: \$=Low \$\$=Mid-Range \$\$\$=High

SDS = Social Distance Safe
may proceed following health mandates

HML = Health Mandates Lifted
wait until health mandates change if a professional is needed for the project and the property is occupied

DIY = Do It Yourself
projects for you and/or your household follow health mandates if and when getting supplies
