

Get involved with the **Alaska Community Health Worker Network!**

What is a Community Health Worker?

Community Health Workers (CHWs) help people access needed health and social services.

CHWs are frontline public health workers (volunteer or paid) who are trusted members of the community they serve.

Examples include: Community Health Aide, Peer Navigator, Traditional or Cultural Healer, Family or Health Advocates and other supportive roles.

**Take this survey
to provide valuable
insight about CHW
work in your
community**
